

Enes Ayaz received the B.Sc. and M.Sc. degrees in power electronics in 2019 and 2022, respectively, from the Department of Electrical and Electronics Engineering, Middle East Technical University (METU), Ankara, Turkey. He is currently working toward the Ph.D. degree in power electronics at KTH, Royal Institute of Technology, Stockholm, Sweden, and his current research interests include traction inverters and modulations in power electronics.

Shahriar Sarmast Ghahfarokhi was born in Esfahan, Iran, in 1994. He received the B.Sc. and M.Sc. degrees in electronics engineering and power electronics engineering from the Department of Electrical Engineering, Sharif University of Technology, Tehran, Iran, in 2018 and 2020, respectively. His research interests include power electronics, wireless power transfer, AC–DC micro-grids, and renewable energies. Currently, is pursuing a PhD at KTH, Stockholm, working on an EU project named PowerizeD, which involves contributions from over 60 partners. The PhD project aims to optimize and integrate high-power inverters of a BEV traction system with the motor. The main focus will be on WBG devices and increasing battery voltage up to 1250V.

Staffan Norrga was born in Lidingö, Sweden, in 1968. He received the M.Sc. degree in applied physics from Linköping Institute of Technology, Linköping, Sweden, in 1993, and the Ph.D. degree in electrical engineering from the KTH Royal Institute of Technology, Stockholm, Sweden, in 2005. From 1994 to 2011, he worked as a Development Engineer at ABB, Västerås, Sweden, in various power-electronics-related areas such as railway traction systems and converters for high-voltage direct current (HVdc) power transmission systems. He currently holds a position as Associate Professor in power electronics at the KTH Royal Institute of Technology. In 2014, he co-founded Scibreak AB, Järfälla, Sweden, which is currently part of Mitsubishi Electric. He is the inventor or co-inventor of more than 15 granted patents and has authored or co-authored more than 100 scientific papers published at international conferences or in journals. His research interests include power electronics and its applications in power grids, renewables, and electric vehicles.

Hans-Peter Nee (Fellow, IEEE) was born in Västerås, Sweden, in 1963. He received the M.Sc., Licentiate, and Ph.D. degrees in electrical engineering from the Royal Institute of Technology (KTH), Stockholm, Sweden, in 1987, 1992, and 1996, respectively. Since 1999, he has been a Professor of power electronics with the Department of Electrical Engineering, KTH. His research interests include power electronic converters, semiconductor components, and control aspects of utility applications, such as flexible ac transmission systems and high-voltage direct current transmission, and variable-speed drives. Dr. Nee was a member of the Board of the IEEE Sweden Section for many years, and also the Chair of the Board from 2002 to 2003. He is also a member of the European Power Electronics and Drives Association and is involved with its Executive Council and International Scientific Committee.
